M.A.C.S.S. trading as Mining and Construction Safety Specialists is a niche service provider to the mining, oil / gas, construction and manufacturing industries both in Australia and Overseas.

At Macssgroup we believe Safety is an inherent part of doing business. For this reason, Macssgroup has been a successful provider to the Mining and Construction industries for the past 10 years in Australia and across the Asia Pacific Region.

The Macssgroup Philosophy is:

- Safety should be part of what we do, not separate from it
- Safety should be simple, not complex
- Safety should be cost effective

Macssgroup knows:

- Safety is achieved through understanding, coaching, mentoring and having simple and easy to use systems
- To stay competitive we need to have our finger on the pulse and stay abreast of current issues within the industry
- Quality is the basis of our product and service and is that which keeps our clients coming back
- Every organisation and industry sector has its own unique challenges

What does Macssgroup offer:

- Access to expert advice in safety in the mining, construction, oil and gas and manufacturing industries
- Many years of combined experience in the mining, construction, oil and gas and manufacturing industries
- Identification of potential gaps in your safety management system
- Practical and cost effective solutions to overcome identified shortfalls
- Development of systems that become an inherent part of your business
- Ensuring that legislative requirements are captured and built into your safety management system
- Value for money on a *keep it simple* philosophy
- Systems and hands on professionals available

M.A.C.S.S. core business is to provide contract safety services to companies whose aim is to achieve a performance benchmark far superior to their peers. We are confident we can work within any environment anywhere in the world and provide a level of excellence second to none. We have delivered and continue to deliver advanced safety services that meet the higher level of safety demanded by the world's most progressive companies across Australia and the Asia Pacific region.

Our Expertise:

M.A.C.S.S. personnel have extensive experience in mining (open cut and underground), processing, emergency response, construction, explosive management, risk management, open pit mining, electrical, project mobilisation, critical incident investigation, legislative systems mapping, environmental and web based safety management systems development. They have also had previous experience as government regulators and are accredited Federal Safety Officers in accordance with the BCII Act 2005.

Our Consultants:

Our Consultants are dedicated safety professionals who have experience and knowledge in all aspects of Mining, Construction, Petroleum and Industrial Manufacturing Safety System development as well as specialist advice in metalliferous and coal industries in open cut and underground environments.

Our collective expertise in workplace and occupational health and safety, combined with our diverse industry experience makes Macssgroup the preferred choice for many companies across Australia and Internationally. Our ability to deliver on time and on budget has been a winning combination and a primary contributor to our success.

Our Results:

The only approach to workplace safety is:
“No Incidents No excuses”

- Expert Health, Safety and Environment advice
- Identification of potential gaps in Safety Management Systems
- Practical and cost effective solutions to overcome identified shortfalls
- Coaching and mentoring current staff to assist in raising your safety systems to a level that far exceeds your expectations
- Ensuring your systems meet relevant legislative requirements
- Long and short term staffing requirements
- Organise the entire OHS component of your project mobilisation including (HR, Training, Environment, Security and Legislative compliance, Pre-employment medicals, fit for work programs)
- Identifying and considering incident information
- Identifying critical failures
- Providing practical and effective recommendations to mitigate recurrence
- Developing complete OHS packages that are mapped against the relevant legislative standards as well as client/ contractual

Macssgroup are agents for both Bow Tie XP and Skytrust.

[Bow Tie XP](#) is a next generation risk assessment software tool that uses the Bowtie Method to assess risks. BowTieXP is unique in its ability to visualise complex risks in a way that is understandable.

[Skytrust](#) is a cloud based integrated risk management platform set to revolutionise the way business manages information, risk and people.
